SC-INDUSTRIAL

INCOLDISO DOORS

Puerta corredera de alta resistencia

The heavy duty isothermal sliding door

Diseñada para aperturas de grandes dimensiones, la nueva puerta SC-INDUSTRIAL se destaca por su innovador sistema de guía con cierre tridimensional, que mantiene el panel perfectamente perpendicular durante todo el movimiento.

Esta configuración garantiza un cierre preciso y una elevada hermeticidad.

La parte inferior incorpora nuevas guías de baja fricción que aseguran un desplazamiento extremadamente suave, incluso con puertas de gran peso. El marco de material compuesto ofrece mayor resistencia a impactos y una larga vida útil.

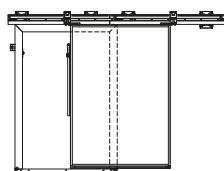

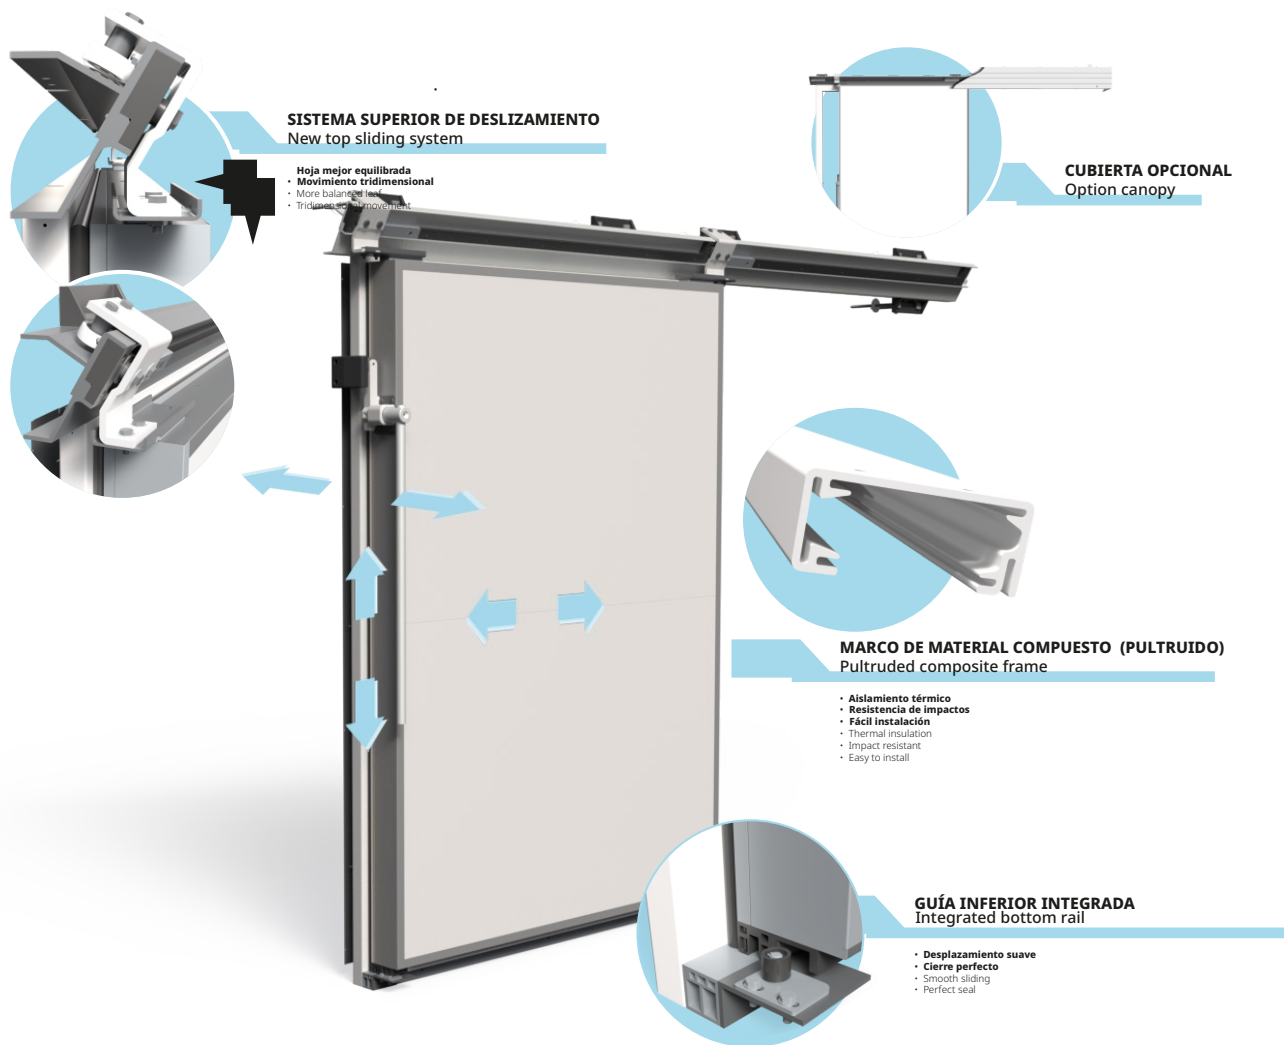

SC-INDUSTRIAL: CORREDERA PARA CUALQUIER DIMENSION

SC.INDUSTRIAL: SLIDING FOR ANY SIZE!

Designed for large openings, the new SC.INDUSTRIAL door stands out for its innovative guide system with three-dimensional closure, which keeps the door panel perfectly perpendicular at every stage of movement.

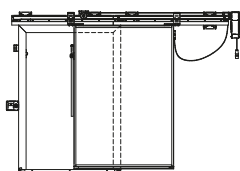

This configuration ensures precise closure and high airtightness.

The lower part is equipped with new low-friction slides, designed to ensure extremely smooth sliding, even with heavy weights. The composite frame offers greater impact resistance and durability over time.
